Interim Report

* For identification purposes only

Characteristics of The Growth Enterprise Market (“GEM”) of The Stock Exchange of Hong Kong Limited (the “Stock Exchange”)

GEM has been established as a market designed to accommodate companies to which a high investment risk may be attached. In particular, companies may list on GEM with neither a track record of profitability nor any obligation to forecast future profitability. Furthermore, there may be risks arising out of the emerging nature of companies listed on GEM and the business sectors or countries in which the companies operate. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board of the Stock Exchange and no assurance is given that there will be a liquid market in the securities traded on GEM. The principal means of information dissemination on GEM is publication on the internet website operated by the Stock Exchange. Listed companies are not generally required to issue paid announcements in gazetted newspapers. Accordingly, prospective investors should note that they need to have access to the GEM website at www.hkgem.com in order to obtain up-to-date information on GEM-listed issuers.

The Stock Exchange takes no responsibility for the contents of this report, makes no representation as to its accuracy or completeness and expressly disclaims any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this report.

This report, for which the directors (the “Directors”) of Shandong Weigao Group Medical Polymer Company Limited (the “Company”) collectively and individually accept responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on the Growth Enterprise Market of the Stock Exchange (the “GEM Listing Rules”) for the purpose of giving information with regard to the Company. The Directors, having made all reasonable enquiries, confirm that, to the best of their knowledge and belief (1) the information contained in this report is accurate and complete in all material respects and not misleading; (2) there are no other matters the omission of which would make any statement in this report misleading; and (3) all opinions expressed in this report have been arrived at after due and careful consideration and are founded on bases and assumptions that are fair and reasonable.

| Finished goods | 47,036 | 39,167 |
| | <u>68,297</u> | <u>57,066</u> |

Increase in raw materials was mainly attributable to the increase in reserves of raw materials by the Company in anticipation of the major suppliers' annual repair and maintenance of equipment in July 2004. Increase in finished goods was mainly attributable to the increase in new customers in the first half of the year. Accordingly, the Group has increased its reserves of finished goods to satisfy the demand from new customers on a timely manner.

14. Trade receivable

The Group and the Company allow an average credit period of 90 days to its trade customers. The aging analysis of trade receivable is stated as follows:

| | THE GROUP | |

| Over 365 days | 1,236 | 1,189 |
| | <u>105,590</u> | <u>95,539</u> |

Increase in trade receivables was mainly due to the increase in sales and new customers.

15. Amounts due from fellow subsidiaries

The amounts represented normal trade receivables and were unsecured, non-interest bearing and had no fixed repayment term.

16. Trade payable and bills payable

The aging analysis of trade payable is stated as follows:

| | THE GROUP | |

According to the relevant laws and regulations of the PRC and its Articles of Associations, the Company and its subsidiaries has to make provisions for certain statutory reserves, i.e. statutory surplus reserve and statutory public welfare fund (hereinafter referred to as “statutory funds”). It is required to transfer not less than 10% and 5% of its net profit after tax of the period to its statutory funds before paying any dividend at the decision of the Board, until the balance reaches 50% of its registered capital. Statutory funds can only be applied to set off accumulated losses or capital increase with prior approval by the relevant government authorities. Statutory public welfare fund can only be utilised for the employees’ special rewards or their collective welfare. Assets acquired out of such fund will not be dealt with as the Group’s assets. If the Group’s statutory funds are not sufficient to eliminate accumulated losses of the previous years, such losses will be set off from the net profit of the period before making appropriation to the statutory funds.

20

According to the laws and regulations of the PRC, distributable profit of the Company was determined at the lower of such amount calculated based on the accounting principles and regulations of the PRC or the generally accepted accounting principles of Hong Kong. As at 30 June 2004, retained earnings distributable to shareholders was RMB57,915,000.

MANAGEMENT DISCUSSION AND ANALYSIS

Corporate Development

Pursuant to the Enterprise Resources Planning ("ERP") system agreement entered into between the Group and a third party system provider on 24 February 2003, the Group commenced implementation of phase II of the ERP project in March this year on human resources management and office automation. The project was expected to become fully operational in the second half of this year. This will further rationalise the flow of management information and performance assessment system of the Group, and enhance the management efficiency.

The Group invested RMB4 million to establish a joint venture together with an independent third party for the production of drug eluting stents. The joint venture became operational in March 2004 and the products have undergone clinical trial. The products were well received after launching into the market. It is expected that registration certificate of the product will be obtained in November this year, and sales of drug eluting stents will begin to generate income thereafter. Commencement of the production of drug eluting stent will further increase the competitiveness of the Company in the high-end product market.

For the six months ended 30 June 2004, total turnover and net profit of the Group were approximately RMB175,790,000 and RMB28,010,000 respectively, representing an increase of 16.6% and 28.6% over the same period last year respectively.

The Company has set up a supervisory team to monitor the progress of the investment projects. Currently, installation of equipment for blood transfusion consumables and procurement of equipment for pre-filled syringes have been going smoothly. Contract for purchasing equipment for phase II of the needle production project has been entered into. As at 30 June 2004, total sum paid on the investment project amounted to RMB39,429,000.

Research and development

For the six months ended 30 June 2004, the Group has made 5 new patent applications and obtained product registration certificate for 12 new products. During the period, R&D expenses amounted to RMB3,516,000.

22

Production

In February 2004, the expansion of the carton box workshop was completed, with an increase in production area of 864 sq.m.. Annual production capacity reached 10 million sq.m. of carton paper. It has further enhanced the vertically integrated production capacity of the Group and the quality of product packaging.

In February 2004, production for the second phrase of the infusion set project commenced. The new production area is 8,100 sq.m.. Annual production capacity reaches 60 million high-end infusion sets (originally designed production capacity of the Group's infusion set workshop was 150 million sets). It has further enhanced our competitiveness in the high-end infusion set market, and consolidated our position in the industry.

For the six months ended 30 June 2004, sales for the Group's six categories of products compared with the corresponding period of 2003 is as follows:

- (1) approximately 77,218,000 sets of single-use sterile infusion (transfusion) sets, increased by 1.0%;
- (2) approximately 4,301,000 sets of single-use sterile blood transfusion products, increased by 16.0%;
- (3) approximately 120,007,000 sets of single-use sterile syringes, increased by 4.8%;
- (4) approximately 294,000 sets of single-use sterile dental devices, increased by 49.3%;
- (5) approximately 3,582 tonnes of PVC granules, increased by 40.2%; and
- (6) approximately 71,662,000 sets of other products, increased by approximately 289%.

The production volume of regular infusion sets was reduced so as to adjust the product mix by increasing the production of high value-added products such as light-proof series, precision filtering series, mini-dosage series and high elasticity series. The production of blood transfusion products was affected by the Government's comprehensive supervision on domestic blood plasma collection market. Most of the blood plasma collection centre and biological laboratory suspended their blood plasma collection operations, and were modified for obtaining GMP certification. This resulted in sharp decrease in the volume of blood plasma collecting device used. The Group anticipated that the use of blood transfusion products will increase after completion of the GMP modification of the blood plasma collection centre. In addition, as we enhanced sales and marketing effort and led to substantial increase in production volume of other products.

24

Sales Network and Marketing

The Group strengthened the development of the South China market. More efforts were devoted to increase the sales of conventional products through promotion meetings and exhibitions. Detailed assessment on the performance of sales personnel were carried out. All of which in turn facilitated increase in sales of non-regular, high value-added products.

The development of new customers achieved remarkable results. For the six month ended 30 June 2004, the Group developed 517 new customers, including 182 hospitals and 66 blood centers. As at 30 June 2004, the Group's total number of customers reached 4,216, including 2,173 hospitals, 314 blood centers, 545 other hospital units, and 1,184 dealers.

The turnover for the period grew by 16.6% as compared to the same period last year benefiting mainly from the effective implementation of the Group's market development strategy. Promising results accomplished from development of the South China market. The development of new clients and the increased cross selling to old customers gained remarkable outcome. The analysis of sales amount by region is as follows:

| Region | For the six months ended 30 June | | |
|---------------------|----------------------------------|--------------------|-------------|
| | 2004 RMB | 2003 RMB | % increase |
| North Eastern | 36,478,000 | 30,233,000 | 20.7 |
| Northern | 59,915,000 | 56,123,000 | 6.8 |
| Eastern and Central | 37,887,000 | 33,093,000 | 14.5 |
| South Western | 7,873,000 | 7,363,000 | 6.9 |
| North Western | 8,432,000 | 8,077,000 | 4.4 |
| Southern | 19,119,000 | 9,999,000 | 91.2 |
| Overseas | 6,086,000 | 5,927,000 | 2.7 |
| Total | 175,790,000 | 150,815,000 | 16.6 |

In addition, with the general trend of price reduction of regular products, the Group devoted more effort on adjusting product mix. Significant increase in sales was achieved for all major product categories. Comparison of turnover for the major products over the same period in 2003 is as follows:

| Product category | For the six months ended 30 June | | |
|----------------------------------|----------------------------------|--------------------|-------------|
| | 2004 RMB | 2003 RMB | % increase |
| Infusion sets | 68,927,000 | 64,353,000 | 7.1 |
| Blood transfusion consumables | 17,553,000 | 16,174,000 | 8.5 |
| Syringes | 58,335,000 | 51,514,000 | 13.2 |
| Dental devices | 1,097,000 | 845,000 | 29.8 |
| PVC granules | 15,375,000 | 7,969,000 | 92.9 |
| Other products | 14,503,000 | 9,960,000 | 45.6 |
| Total | 175,790,000 | 150,815,000 | 16.6 |

HUMAN RESOURCES

As at 30 June 2004, the Group employed a total of 4,143 employees. Breakdown by departments is as follows:

| Departments | Number of employees |
|----------------------------|---------------------|
| Research and development | 88 |
| Sales and marketing | 338 |
| Production | 3,431 |
| Purchasing | 15 |
| Quality control | 35 |
| Management | 47 |
| Finance and administration | 189 |
| Total | <u>4,143</u> |

27

Save as the company secretary, who resides in Hong Kong, all employees of the Group were resided in the PRC. For the first six months of the year, total amount paid by the Group on staff salaries, welfare, and various funds amounted to RMB24,636,000.

FINANCIAL REVIEW

Liquidity and financial resources

The Group maintained sound financial position during the period. As at 30 June 2004, the Group had total cash of RMB150,430,000. For the six months ended 30 June 2004, the Group's net cash inflow from operating activities amounted to RMB30,751,000.

During the period, the overall interests rate of borrowings decreased through obtaining low interest rate loans to repay high interest rate loans. Total bank loans raised amounted to RMB125,650,000. The Group repaid bank loans of RMB136,860,000. The Group's net loan reduced by RMB11,210,000. As at 30 June 2004, the Group's short-term bank loans amounted to RMB75,973,000, and long-term bank loans was RMB149,960,000.

The overall interests paid by the Group during the period was RMB6,838,000.

Gearing ratio

As of 30 June 2004, the Group's gearing ratio, being the ratio of total borrowings to total equity, was 0.67 (the corresponding period in 2003: 1.61). Decrease in gearing ratio was mainly due to proceeds from the listing of the shares of the Company on the Growth Enterprise Market of The Stock Exchange of Hong Kong Limited since 27 February 2004 ("the Listing") and the increase in retained earnings.

Contingent liabilities

The Group did not have any material contingent liabilities as at 30 June 2004.

Capital commitments

As at 30 June 2004, the Group has commitments for the acquisition of assets which were contracted but not provided in the financial statements amounting to RMB28,655,000. Such amounts will be paid by the Group out of the proceeds from the Listing and the Group's internal resources.

Pledge of the Group's assets

As at 30 June 2004, net assets of RMB130,245,000 (31 December 2003: RMB130,796,000) were pledged by the Group.

FUTURE OUTLOOK

The Group expects that the price of chemical industrial raw materials will remain at a high level in the second half of the year due to the impact of crude oil price. In addition, as the Group devotes more effort on Government tender, the trend of descending price of regular products will remain. The Directors considers this as an opportunity in competition. Leveraging on our brand name, capital strength, advantages of extensive product range and cost control of our vertically integrated production, the Group will be able to increase its market share, laying a strong foundation for future development.

30 The Group will continue to speed up launching of new products. The higher profit from high-end products will drive the continuous growth in sales and gross margin. In addition, with the rise in selling price of PVC granules we will increase external sales of medical PVC granules.

While blood plasma collecting centre are in the process of obtaining the GMP modification and certification, we will strengthen the promotion of high-end pressed blood bag and blood segregator consumables. We will endeavor to enlarge market share by replacing conventional blood transfusion consumables with high end products and increase market share following the completion of blood plasma collection centres' GMP modification.

In respect of individual projects, we will work hard on the following:

1. We shall stay focused to ensure the importation and installation of production equipment of pre-filled syringes, high-end blood transfusion consumables and needles are carried out as scheduled. We seek to complete testing and adjustment of those projects by December 2004, and prepare for product launch in the first quarter of 2005;

2. We shall capitalise on the listing status of the Company to participate in various medical device exhibitions to strengthen advertising on the Group's brand name, expanding our sales network and increasing customer bases. We will increase marketing and promotional effort. We will increase promotion of pre-filled syringe, pressed blood bag and catheter needles through customers promotional meetings and new product launch briefing;
3. We will continue to adjust product mix and expedite the intermediate testing and the obtaining of product registration certificate for new products under development, and strive to launch to the market ahead of schedule;
4. Based on the implementation plan of the Enterprise Resources Planning on Office Automation and Human Resources Management, we shall further rationalize the management information flow and enhance management efficiency; strengthen staff recruitment and training to instill the sense of belonging of our staff, laying a sound foundation of human resources to facilitate the Group's development;
5. We shall intensify technology improvement, and increase the extent of automated production. By the end of the year, we shall ensure the completion of automated assembly and modification of the medicine fluid filter and air filter, and the automatic cutting and modification of transfusion device, achieving semi-automation for the production of infusion sets. We shall expedite the processing and assembly of venous infusion needles, and ensure to complete the system automation assembly of needle device by the end of the year.

Comparison of Business Objectives with Actual Progress for the six months ended 30 June 2004

Business objectives as stated in the prospectus

Actual progress

Production

1. to apply approximately RMB40,000,000 of the net proceeds from the Placing for the conversion of workshops and purchase of machinery and equipment for the production of new blood transfusion consumables, pre-filled syringes and venous infusion needles
Applied RMB39,429,000. It is expected that the testing and adjustment of production equipment will be completed by the end of the year. The products will be launched to the market in the first quarter of next year. The details of investment expenditure items are set out in the sector headed "Use of Proceeds".
2. commercial production for the new infusion production workshop is expected to commence in March 2004
The new infusion production workshop with a monthly production capacity of 5 million sets has commenced production at the beginning of the year.

Business objectives as stated in the prospectus

Actual progress

3. to commence commercial production of single-use de-leucocyte blood bag, 0.33mm-1.2mm single-use sterile syringe needle and transparent ultraviolet radiation proof infusion set

The first two products have been launched in the market. The production volume of single-use de-leucocyte blood bag was 38,000 sets. The production volume of 0.33mm-1.2mm single-use sterile syringe needle was 30,620,000 sets. The clinical promotion for transparent ultraviolet radiation proof infusion set has begun and has not commenced mass production.

4. to conduct feasibility study of establishing production facilities in Northwest China

Upon analysis and careful consideration by the Directors, the priority should be placed on establishing production facilities in Southwest China, rather than Northwest China. The feasibility study on establishing a factory in Southwest China has been completed.

Business objectives as stated in the prospectus

Research and development

to invest RMB1.0 million in the development of the new products

Actual progress

The proceeds from the Listing of RMB 1 million has been applied. 12 new product registration certificates have been obtained. Total research and development expenditure amounted to RMB3,516,000.

34

Sales and marketing

1. to apply approximately RMB1.5 million from the net proceeds in market promotion

With the introduction of new products into market, the Group took part in three medical device products exhibitions and held 37 promotional meetings achieving good results. The total capital expenditure used in market promotion amounted to RMB1,718,000, in which 1.5 million was from the Listing proceeds. The Directors considered that the above promotional meetings were important for the Group to further adjust its product mix and brought obvious economic benefits.

Business objectives as stated in the prospectus

2. to set up seven sales offices
3. to expand the sales team to approximately 340 members

Actual progress

In the first half of the year, the Group conducted strategic adjustment on nationwide market network and established regional offices. The offices serving as management centre on regional scale can effectively lower marketing and transportation costs. In the first half of the year, the Group set up nine new offices in Southwest China.

In order to enhance the competitiveness of the sales team, the Group fully implemented its performance based elimination scheme. It recruited 38 new salespersons, and laid off 39 salespersons. The total number of salespersons was 338.

Business objectives as stated in the prospectus

Actual progress

4. to participate in tenders put out by the Government

In the first half of the year, among the Group's client, all hospitals above city level were part of Government's tender. The Group did not lose any tenders in all regional tendering, and the success rate was 100%.

5. to further increase customer base by securing about approximately 150 new customers

The Group has secured 517 new customers, including 182 hospitals and 66 blood centers. The Group's total number of customers reached 4,216.
